The man who has been persuaded to try a pair of ordinary price shoes, and ruins his feet, soon sees (and feels) the error of his way. The best shoes made are the cheapest. The Burt & Packard "Korrect Shape" shoes are the best because they look, feel and wear as only a custom shoe can.

"Don't spoil your feet by wearing cheap shoes."

**Station Master for Scranton.**  
Another new office has been created by the officials of the Delaware, Lackawanna and Western railroad. It will be known as the station master, and it is understood that Conductor Peter McCann will be appointed to the position.

The duties of the station master include the starting of all passenger trains, general supervision over the handling of baggage and express at the Lackawanna avenue station, and the directing of various other matters in connection with the local passenger traffic. He will also have full charge of all the employees in and about the station and direct the work of facilitating the speedy departure of trains.

Mr. McCann, the gentleman slated for the position, is one of the best known railroad men on the Lackawanna system. For several years he has been conductor on the pay train, and previous to that time was employed in various responsible positions under the company.

The new train master represents the Fourteenth ward in select council and is a very popular and obliging public servant. It is understood that the appointment will be made today and Mr. McCann will assume his duties on Monday.

**Moses Taylor Hospital.**  
The officials of the Delaware, Lackawanna and Western company are desirous of pointing out the advantages of Moses Taylor hospital for the treatment of injured mine employees, and with that end in view, the president and secretary of the accidental funds of the Cayuga, Bristish, Hyde Park, Diamond, Diamond air shaft, Storrs Nos. 1, 2 and 3, were invited to visit the hospital yesterday.

In company with District Superintendent Henry A. Phillips, who has charge of the above named mines, the officers of the various funds were shown through the hospital by Superintendent Miss Grant, and made acquainted with the system of treatment.

**BEAUTY, THE CONQUEROR BELLAVITA**

ment employed for the benefit of the company's employees.  
The object was to acquaint the men of the advantages in receiving treatment at the hands of trained nurses instead of remaining in their homes when suffering from injuries received in the mines or on the railroad.  
The men who were shown through the hospital yesterday will impart the information received to the men in the mines, and at a later date Superintendent Loomis, of the coal department, will meet with them and have a definite understanding regarding the admission of patients.

**Paying the Trainmen.**  
The various trainmen employed on the Lackawanna road were paid yesterday, and the work will be finished today.  
Some of the employees received a substantial increase over previous months owing to the increased number of hours worked, and the new schedule taken altogether has proven of much benefit financially to the men.

**Equipment for railroads.**  
According to the "Railroad Gazette," the railroads placed during October orders for 33,023 cars of all kinds. Of this number 19,415 were box, stock, furniture and refrigerator cars; 10,781 were gondola and coal cars; 1700 were steel cars; 810 were flat cars, and 314 were passenger and street railroad cars, 100 of the latter being ordered for export. Of the 33,023 cars, about 1,700 are to be built by railroads at their own shops. Orders for 223 locomotives of all kinds were also noted, of which about thirty-eight were for export.

The division of types of the 223 locomotives was approximately: Two hundred and forty-two freight locomotives, forty-six passenger and thirty-five switching locomotives. Nearly 100 more locomotives were ordered than in September, while about three times as many cars were ordered in October as were noted in September. The cars ordered during October almost equal in number those ordered in June, July, August and September combined. Some of the large orders placed in October had been deferred for many weeks on account of high prices.

**DUNMORE DOINGS.**

**Special Meeting of School Board Last Evening—Teachers Will Be Paid for Time Spent at Institute.**  
Last night's special meeting of the school board in the central building was called to order by President Webber with Directors Kellam, Spencer, Costello, Webber and Miller present. After the reading and adoption of the minutes of the last regular and special meetings, the reports of the standing committees of the various schools were heard. All reported everything in their districts as very favorable.

The superintendent's report for the school month of October was then called for. Superintendent Board stated in his report that the number enrolled for October, 2,953, was the largest number enrolled for this month on record. The average attendance, 1,921; percentage, 62; visits to schools by superintendent, 52; attendance in all the schools, very good. The habit of parents letting their children stay at home on trivial excuses was commended, as several will have to be demoted for this reason. It was suggested that storm doors be put on the central building. The report was adopted.

The report of the truant officer was taken up next. It was as follows: Visits made to homes of pupils, 149; arrests made, 4. A great many cases of diphtheria and whooping cough were found in many homes. The report of the truant officer was adopted.  
The committee on bills, Messrs. Spencer and Costello, then received the attention of the board. Several exonerations were read and approved. The committee appointed to meet and decide on text books for the commercial school reported, and the list of books submitted was approved by vote. The rate song book, "Melodia," was adopted as a supplementary text book by general concurrence of the board.  
A large number of bills were ordered paid, and it was decided to pay the teachers for their time spent in the county institute.

**Silk Waists, Jackets, Separate Skirts, Capes,**  
Although this is a bustling, active, swiftly-moving business, we make our selections with care. The best evidence of how much care is—the garments themselves. Note with as much deliberation as you wish, how even the smallest details are properly done—the making of button holes, the stitching of seams, the turn of a collar, the sewing on of buttons. These are little things, but they have helped to make our garments what they are. No matter what price we ask, you get the best possible for the price.

**Women's Suits**  
Most stores want you to know that they manufacture their own Cloaks and Suits. We want you to know that we do not. The secret of our success has been largely in our freedom to choose each kind of a garment from the very best maker of that particular garment. For instance: We recently advertised a certain garment in three grades. Each of these grades was made by a different house, and each kind was much better than it could have been if any one house had made them all. It's the close competition of all the best houses for your trade that keeps the standard at our store so remarkably high.

**New Styles in Furs**  
We are not novices in the fur business. Our experience in furs dates back many years. Our styles for this season are extremely handsome and were selected with great care. Fur Jackets are shorter and jauntier in styles. The favorite shapes are cut from a Revillon Model—short and curved at hips, and sloping in front. In Fur Neckwear the styles are very attractive. For Tailor-Made Suits, Neck Scarfs and Collarettes come in many combinations. Collarettes have high-rolling collars, warm either up or down.
